Benefits

Premium 24k Gold Anti-Wrinkle Skincare

Pure 24k gold is known to calm and equalise the electrical energy of the skin in the most delicate areas of your face. The most beneficial property of pure 24k gold is that of being an anti-ageing element. It stimulates the growth of new skin cells and helps to maintain the elasticity of the skin by reducing the breakdown of elastin. It even improves the production of an essential protein of skin tissues, also known as collagen.

Pure 24k gold properties is also known to prevent pigmentation and delays the appearance of age-spots as it slows down the melanin (darkening pigment) secretion. It also detoxifies the skin and is anti-inflammatory in nature. Combined with the fact that it helps in skin cell regeneration, these properties make gold effective in repairing the skin, increasing circulation and improving the appearance of scars and wrinkles.
